Professional Experience

ConeTec

November 2025 – Present

Business Intelligence Developer

Vancouver, Canada

- Designed and shipped 15+ Power BI solutions (semantic models, DAX, Power Query) across finance, sales, HSE, and project accounting for an 800+ employee geotechnical firm operating across 5 countries and 48 offices, serving 20+ direct stakeholders.
- Architected end-to-end reporting pipelines using Azure Functions, ADF, ADLS Gen2, and Azure SQL, eliminating 4–6 hours of weekly manual data prep across recurring reporting processes.
- Implemented Row-Level Security and column-level masking on Azure SQL payroll datasets, enabling country-specific access while protecting salary data per regional compliance and HR policies.
- Designed governed BI data workflows with raw, staging, and curated layers plus validation checks, standardizing KPI definitions and improving consistency between source systems and Power BI reports.
- Developed 10+ Power Automate workflows for AP invoice approvals, risk notifications, and operational alerts, replacing manual follow-ups with auditable, governed processes.

Spring Financial

March 2025 – April 2025

Business Analyst

Vancouver, Canada

- Built an executive Tableau dashboard tracking credit risk KPIs, including AUC, precision, default rates, and approval trends, reviewed weekly by the CEO, reducing review meetings from 60 to 25 minutes.
- Analyzed core banking, CRM, and ML model output data to identify credit risk trends, approval patterns, and portfolio performance issues for faster lending decisions.
- Partnered with Risk, Operations, and Data Science teams to define KPIs, document business logic, validate reporting outputs, and translate requirements into analytical specifications.

Canfor

June 2024 – February 2025

Credit Analyst, Reporting & Analytics

Vancouver, Canada

- Developed Power BI dashboards for \$50M+ credit portfolio, giving executives daily visibility into utilization, aging, payment trends, and bad debt KPIs used weekly to guide collections and credit-limit decisions.
- Validated portfolio data and supported credit risk reporting using Oracle JD Edwards, credit bureau data, and internal reporting tools to ensure accuracy of executive dashboards.
- Implemented automated alerts, reducing Days Sales Outstanding (DSO) by 5 days, accelerating collections and improving cash flow.
- Wrote SQL queries and performed ad-hoc analysis for credit management, finance, sales, and collections stakeholders.

Projects

Retail Analytics Pipeline (Bronze → Silver → Gold) 🏆 | ADF, ADLS Gen2, Databricks (Spark/Delta), Synapse, Key Vault

- Built medallion architecture for retail transaction data through Bronze (raw), Silver (cleaned), and Gold (curated) layers.
- Defined a star schema and data-quality validation rules, ensuring faster queries and reduced dashboard maintenance.

Credit Risk Modeling with Machine Learning 🏆 | Python, Scikit-learn, XGBoost, SHAP

- Built classification models to predict loan defaults, achieving 0.78 AUC and delivering SHAP-based insights to stakeholders

Technical Skills

BI & Analytics: Power BI, DAX, Power Query, semantic models, data modeling, Tableau, Excel, KPI reporting

Data & Querying: SQL Server, PostgreSQL, MySQL, Snowflake, data validation, ad-hoc analysis, reporting datasets

Python & Automation: Python, pandas, NumPy, matplotlib, scikit-learn, API extraction, workflow automation

Cloud & Data Engineering: Azure Functions, ADF, Azure SQL, ADLS Gen2, Synapse, AWS S3, ETL/ELT pipelines

Workflow & Collaboration: Power Automate, SharePoint, Microsoft Graph, Git/GitHub, Jira, Confluence, Agile/Scrum, stakeholder management

Education

Douglas College

2022 – 2023

Postgraduate Diploma in Computer and Information Systems, Data Analytics

Vancouver, Canada

Andres Bello University

2012 – 2016

BSc in Economics, Finance Concentration

Santiago, Chile

Languages

English: Full professional proficiency.

Spanish: Native.
