Professional Experience

ConeTec **November 2025 – Present**

Business Intelligence Developer *Vancouver, Canada*

- Built an AI-assisted invoice-processing workflow using Power Automate and AI Builder to extract job numbers and supporting evidence from PDF invoices, route low-confidence results and exceptions for staff review, and enable hourly AP processing, reducing manual document review effort by an estimated 60–80%.
- Built and deployed an English- and Spanish-language PII-redaction workflow using Azure AI Language, Python, Azure Functions, Power Automate, and SharePoint, masking names, email addresses, and phone numbers while preserving original HR text.
- Led Azure integration development across finance, HR, safety, and operations, building metadata-driven REST API and SharePoint ingestion using Python, Azure Functions, Data Factory, ADLS Gen2, and Azure SQL to centralize reusable data preparation.
- Developed financial and operational Power BI dashboards covering P&L, cash flow, forecasts, and project costs, supporting Finance and business leaders with consistent reporting and decision support.
- Built reusable SQL staging and reporting layers with validation and reconciliation checks, extended production ingestion and repaired document-processing failures to support reliable downstream reporting.

Spring Financial **March 2025 – April 2025**

Business Analyst *Vancouver, Canada*

- Used SQL and Python to analyze core banking, CRM, and ML model outputs, investigating credit-risk trends, approval patterns, and portfolio performance.
- Partnered with Risk, Operations, and Data Science teams to define KPIs, validate reporting outputs, and translate stakeholder requirements into documented business logic and analytical specifications.

Canfor **July 2024 – February 2025**

Credit Analyst, Reporting & Analytics *Vancouver, Canada*

- Developed Power BI dashboards providing daily visibility into receivables, aging, credit exposure, payment trends, and bad-debt KPIs for Finance and Credit teams monitoring a $50M+ portfolio.
- Used SQL and reporting tools to extract, validate, reconcile, and analyze JDE and downstream reporting data, investigating discrepancies between source-system records and business reports.
- Implemented automated monitoring and reporting that contributed to reducing Days Sales Outstanding (DSO) by five days, supporting credit and collections decisions.

Projects

Credit Risk AI Platform | *Azure AI Search, Azure OpenAI, Document Intelligence, Python*

- Built an Azure AI demo with synthetic lending data, cited RAG answers, and invoice extraction to support analyst review.
- Deployed a policy assistant in Azure AI Foundry with evaluations, prompt records, human review, and audit tracking.

Aclara: Banking Data & AI Platform | *Python, SQL, dbt, Azure*

- Built a banking hackathon prototype combining transaction pipelines, AI-assisted charge analysis, and simulated data.
- Implemented dbt/DuckDB transformations, data-quality checks, PostgreSQL operational records, and a dashboard tracking operational metrics.

Technical Skills

AI & Automation: Azure Foundry, AI Search, Document Intelligence, Azure AI Language, AI Builder, Power Automate, n8n
BI & Financial Analytics: Power BI, DAX, Power Query (M), Tableau, Excel, financial and operational reporting
Data & Programming: Python, SQL, pandas, SQL Server, PostgreSQL, data validation, dimensional modeling
Azure & Integration: Azure Functions, Data Factory, ADLS Gen2, Azure SQL, SharePoint, REST APIs, Microsoft Graph
Delivery & Governance: Git/GitHub, Bicep, GitHub Actions, testing, documentation, requirements gathering

Education

Georgia Institute of Technology **Starts Spring 2027**

Master of Science in Computer Science — Admitted *Atlanta, GA, USA*

Douglas College **2022 – 2023**

Postgraduate Diploma in Computer and Information Systems, Data Analytics *Vancouver, Canada*

Andres Bello University **2012 – 2016**

Bachelor's Degree in Business Administration and Economics, Finance Specialization *Santiago, Chile*

Languages

English: Full professional proficiency.
Spanish: Native.
